THE CREATIVE SOLUTION FOR YOUR NEXT UNIQUE SHOW

ELECTRONICS
DEVELOPER

WWW.WAHLBERG.DK

Wahlberg Motion Design develops and produces technical solutions for the entertainment industry worldwide. Our products are being used at fairs, shows and major concert tours: by singer-songwriter Drake, BMW and Eurovision and at Superbowl and Champions League events. Wahlberg products are unique because they are controlled by DMX, and because their design and prices are in line with industry demands. We have a large international network and are in close touch with our Danish customers, such as Aarhus Theater, Danish Broadcasting Corporation and Smukfest music festival.

The Wahlberg solutions are the result of years of development based on a solid understanding of embedded software combined with good mechanical design and hands-on experience from the industry. We are a team of engineers, programmers and electronics technicians who create the products on the premises and put them on display at international fairs and online. The company is growing steadily, and in 2017 was ranked as one of that year's high jumpers in Børsen, the Danish newspaper that specializes in business news. At Wahlberg Motion Design, local atmosphere fuses with global perspective - we gather in the lunchroom and yet have the whole world as our playground.

In our development team, the tasks begin with the good idea and end with the finished product - there is a short way from idea to finished prototype. We reach that goal by showing responsibility and taking chances, using method and thoroughness to complete the job.

If you are an electronics developer and strong on embedded software, we need your knowledge and skills and your ability to carry the task to a successful end.

In the job there is a focus on the control and adjustment of motors; smaller DC motors with PWM adjustment and more powerful AC motors with frequency converters. All our motors are power-controlled with feedback and are positioned with PID adjustment.

The overall control of the products takes place by DMX protocol, but at the moment we are implementing new protocols for control and monitoring.

We invite you to find out more about us on various social media. And you may also experience the strength and finesse of the products on videos to be found on our website: www.wahlberg.dk.

APPLY FOR THE JOB HERE: JOB@WAHLBERG.DK

APPLICATIONS WILL BE DEALT WITH AS THEY COME IN, UNTIL WE HAVE FOUND OUR NEW COLLEAGUE.

Track Runner, American Spirit
Aarhus Theater, Denmark, 2016
