

Winch 10 cable

A power wire winch for lifting lamps or other electrical equipment

The Winch 10 cable is a small winch for lifting small electrical objects on stage. A special kevlar improved powercable is used for lifting the objects and a slipping transfers the power to the cable.

The power cable runs on a separate circuit, equipped with a separate fuse and plug, so you can choose your own voltage and type of signal.

The winch is controlled by the DMX channels from the lighting desk. The winch 10 cable has an advanced positioning system with 16 bit precision, which yields a high level of accuracy down to less than 1 mm. The lifting speed is also controlled by DMX.

Artists and performers all over the world have used the winches as technical devices in making curtains, lamps and other elements move in formation or individually.

DMX WINCH 10 cable

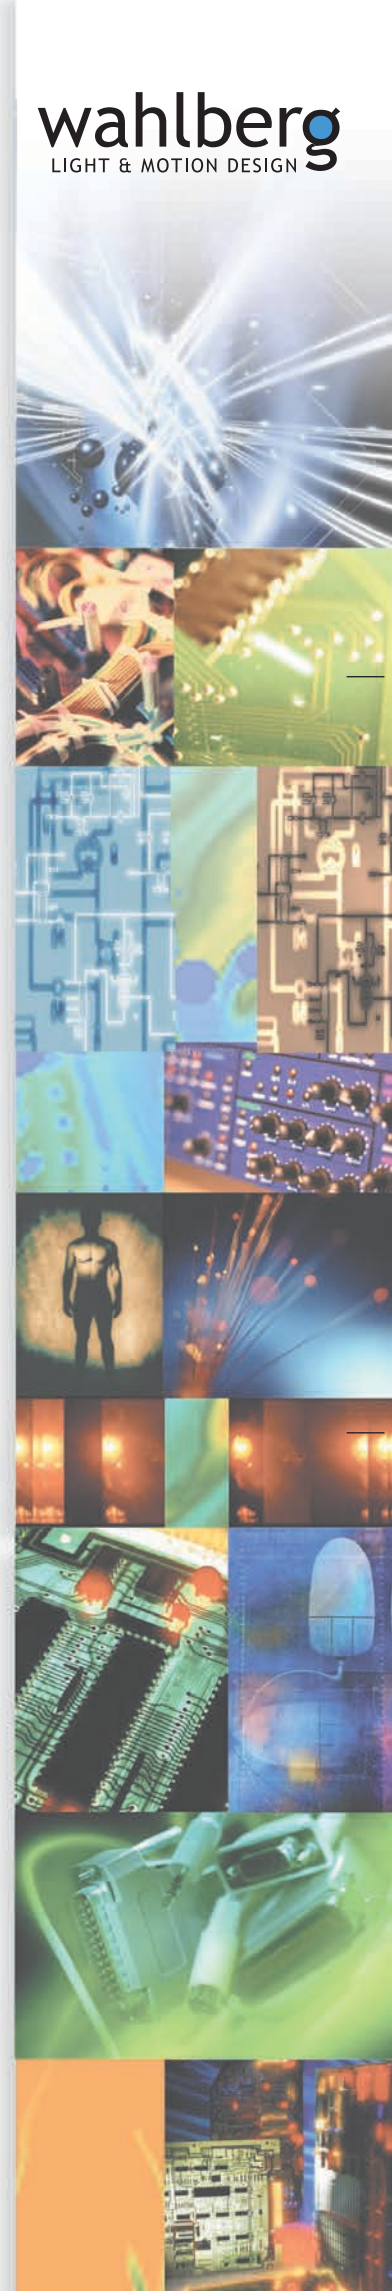

Technical specifications:

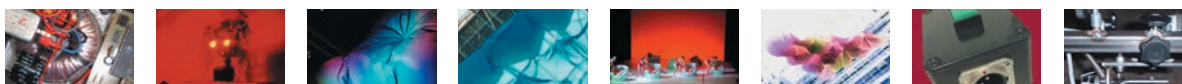

Voltage	220-240 Vac 50 Hz optional 110-129 Vac 60 Hz
Power plug	Powercon male
Power consumption	300 Watt
Control signal	DMX 512 1990 + dmx 512a/ 7 channels
DMX Connection	5 pole XLR, in & link
Positioning	Via DMX, 16 bit channel
Precision	Less than 1 mm
Lifting capacity	10 kg (22 lbs)
Lifting height	10 m (33 ft) optional 4 m (13 ft)
Lifting wire	Special cable
Lifting speed	Variable 1-30 m/s (0.4-12in/s)
Min Load	2,5 kg (5,5, lbs)
Mounting clamps	1 slim coupler for 50 mm (2 in) tube
Dimensions	40 x 30 x 30 cm / 15,7 x 11,8 x 11,8 inch (L-W-H)
Net weight	10 kg/22,05 lbs
