

TRACK RUNNER

wahlberg
LIGHT & MOTION DESIGN

The Track Runner enables smooth, linear, horizontal movements of objects and lamps

The Track Runner is mounted on an extruded aluminum track at any length (from 1 up to 50 meters). The track can carry up to 250 kilo pr meter. The track can be adapted with curves and bends according to your specifications.

The Track Runner is rolled onto the track. When power is connected, the Track Runner can move horizontally from point to point controlled from the lighting desk.
The Track Runner is a self-contained DMX controlled motor unit with a DMX interface, motor controller, and also has a positioning control system with pid regulation.

The Track Runner has been used on the ground, in the ceiling and in combinations - moving heavy stage sets smoothly or rigs with lamps or other items for various productions in theater and show.
